

ACC Silicones Adhesives – Stay ahead of the legislation

ACC Silicones Adhesives – Stay ahead of the legislation

In March 2013 ACC Silicones launched a unique range of Alkoxy based silicone adhesive sealants.

The range of 6 products had the flowing key features:

Key Features

- Low Outgas – reduced residue particularly in high temp applications
- Excellent primer less adhesion to a wide variety of materials including plastics
- Paste and Flowable versions
- Not affected by changes in CLP Labelling regulations

Changes in Health & Safety legislation coming into effect in May 2015 will require that most of the traditional **Acetoxy** based Silicone Adhesives be re-classified.

They will now have to carry the danger warning symbol of a Red Diamond

They will also carry additional warning safety phrases such as:

H315 Causes skin irritation.

H319 Causes serious eye irritation.

P264 Wash . . . thoroughly after handling.

P280 Wear protective gloves / protective clothing / eye protection / face protection.

P302+P352 IF ON SKIN: Wash with plenty of soap and water.

P332+P313 If skin irritation occurs: Get medical advice / attention.

The ACC Silicones Alkoxy Adhesives will not be affected by the H&S changes making them the natural choice as an alternative product, offering in many instances superior performance.

Product Specific Features

Product	Unique Features		
AS1703	Paste	Translucent	Thixotropic paste
AS1704	Paste	Black	High Temperature +250°C thixotropic paste
AS1724	Flowable	Translucent	Low viscosity 44,000 mPas
AS1725	Flowable	Black	Low viscosity 47,000 mPas
AS1726	Flowable	Translucent	Very Low viscosity 3,100 mPas
AS1727	Flowable	Black	Very Low viscosity 3,400 mPas
